

SANTOSHI PARTE

JR. ARTIFICIAL INTELLIGENCE DEVELOPER

CONTACT

Santoshiparte16@gmail.com
www.linkedin.com/in/santoshi-parte
<https://github.com/SantoshiParte>

SKILLS

Programming language:

- Python

Data & AI:

- Machine Learning
- Deep Learning
- Computer Vision
- NLP
- Generative AI
- RAG Architecture
- OCR Systems
- Data Analysis

tools:

- Numpy
- Pandas
- OpenCV
- Matplotlib/Seaborn
- Scikit-learn
- Tensorflow/Pytorch

Tools:

- Git
- Jupyter Notebook
- VS Code

API:

- Fast APIs
- Vector DB

PROFILE

Aspiring AI Developer with practical experience in Python, machine learning, and real-world project development. Strong interest in developing intelligent systems, with a focus on improving problem-solving and coding efficiency. Looking to contribute to innovative projects while expanding technical expertise.

EXPERIENCE

Jr.AI dev

Oct 2024- present

Worked primarily on Python development, focusing on backend logic and application functionality.
Implemented mathematical and logical solutions as per client requirements.
Debugged and fixed errors to ensure smooth execution of applications.
Gained practical exposure to real-world software development workflows.
Collaborated with team members and adapted to project changes effectively.

EDUCATION:

University of Mumbai, Kalina

2025 – 2027

M.Sc. Information Technology (Artificial Intelligence)

AVM's KBP Degree college, Thane

2022-2025

Bachelor's of Science in IT, CGPA: 9.05

Jnana Sarita Junior College, Mulund(W)

2020-2022

Science, 54.33%

Sankalp English School

2020

Percentage: 81.80%

(FAISS/ChromaDB/Pinecone)

- AWS basics

PROJECTS

Sign Language Detection System

Technologies: Python, OpenCV, TensorFlow, CNN, Computer Vision

- Developed a real-time sign language recognition system using deep learning techniques.
 - Implemented gesture detection through webcam input and converted gestures into readable output.
 - Improved communication accessibility using AI-based hand gesture classification.
-

Vehicle Number Plate Detection & OCR

Technologies: Python, OpenCV, EasyOCR/Tesseract OCR, Image Processing

- Built an AI-based vehicle number plate detection system achieving accurate OCR extraction from real-time vehicle images.
 - Implemented OCR pipeline for automatic number recognition from images and videos.
 - Applied image preprocessing techniques to improve recognition accuracy.
-

RAG-Based Construction Rules Assistant

Technologies: Python, LangChain, LLMs, Vector Database, Speech Recognition

- Developed a Retrieval-Augmented Generation (RAG) assistant for construction rule guidance.
 - Integrated voice input and voice output for interactive user communication.
 - Designed document retrieval and AI response pipeline for rule-based query handling.
-

AI-Based 2D to 3D Room Design & Light Recommendation Engine

Technologies: Python, AI/ML, Recommendation System, 3D Visualization

- Worked on converting 2D room layouts into intelligent 3D room visualization.
- Developed a smart lighting recommendation engine based on room dimensions and design.
- Enhanced interior planning experience using AI-driven recommendations.
